CUMULATIVE INDEX OF AUTHORS FOR 1971

Allegra, S. R., September, 403
Anderson, A. E., Jr., June, 333
Anderson, R. E., December, 469, 485, 487, 505, 515, 547, 559, 563, 567, 573
Angevine, D. M., December, 467
Antonovych, T. T., June, 233

Beier, L. S., September, 459
Benditt, E. P., June, 337
Berenson, G. S., March, 57
Birtch, A. G., June, 299
Bradley, G. M., June, 309
Busch, G. J., June, 253, 299

Camp, F. R., Jr., September, 377
Carpenter, C. B., June, 299
Castelli, W. P., March, 153, 165
Cavallo, T., June, 185
Christian, C. L., June, 340
Cihak, R. W., December, 525
Cotran, R. S., June, 185

Dalferes, E. R., Jr., March, 57
Dorfman, H. D., September, 349

Foraker, A. G., June, 333
Friedman, M., March, 81

Galvanek, E. G., June, 253, 299
Garcia, M. J., March, 129
Gherardi, G. J., March, 173
Ginsburg, I., September, 345
Good, R. A., September, 389
Gould, S. E., December, 547

Haggitt, R. C., December 587
Harrington, J. T., June, 185
Haust, M. D., March, 1
Hayashi, T., June, 321
Henry, R. L., September, 377

Jaffe, H. L., September, 349
Jordan, S. W., December, 533, 539, 551, 561

Kannel, W. B., March, 129
Kersey, J. H., September, 389
Kessler, D. L., September, 377
Key, C. R., December, 471, 475, 521, 529
Kirshbaum, J. D., December, 559
Kobayashi, K., June, 299

Leader, R. W., March, 177
Lewis, E. J., June, 185
Lieber, C. S., September, 343
Limas, E., June, 233
Linhartová, A., June, 333
Lou, T. Y., September, 421
Lukl, P., Jr., June, 299

McMillan, G. C., March, 176
McNamara, P. M., March, 129
Meuwissen, H. J., September, 389
Moran, R. F., March, 153
Mostofi, F. K., June, 233
Muirhead, E. E., December, 587

Nakazawa, H., September, 459
Nalbandian, R. M., September, 377
Nowell, P. C., September, 347

Pearson, G., March, 129
Pitcock, J. A., December, 587
Polesky, H. F., September, 441

Radhakrishnamurthy, B., March, 57
Rankow, R. M., September, 453
Reynolds, E. S., Jr., June, 253
Rosen, S., June, 209
Rubin, E., September, 343

Srinivasan, S. R., March, 57
Steer, A., December, 501, 541
Steiner, G. C., September, 349
Stemmermann, G. N., June, 321
Szulman, A. E., December, 575

Tedeschi, C. G., March, 165
Tedeschi, L. G., March, 165
Teplitz, C., September, 421
Thayer, W. R., Jr., September, 421
Troup, G. M., December, 493

Watts, H. F., March, 31
Wexler, B. C., March, 180
Wilens, S., September, 459
Wolf, P. L., September, 377
Wolff, M., September, 453

Yamamoto, T., December, 531, 535

CUMULATIVE INDEX OF SUBJECTS FOR 1971

ABH antigens, in fifth week post-fertilization embryos, December, 575–585
Acid mucopolysaccharides, atherosclerosis and, March, 58
Aging, atherosclerosis and, March, 62
  ionizing radiation and, December, 567–571
Allografts, human renal, in long-term survivors, June, 253–298
Alpha-1-antitrypsin deficiency, liver and, March, 173
Amino acids, screening for, in pediatric patients, June, 313
Aneurysm, of aortic sinus of Valsalva, with fistulous cavity in interventricular septum (case report), September, 459–462
Angiomatosis, skeletal, and massive osteolysis, September, 359
Antigens, ABH, in fifth week post-fertilization embryos, December, 575–585
Aorta, fatty streaking of, in atherosclerosis, March, 3
Aortic sinus, of Valsalva, aneurysm of, with fistulous cavity in interventricular septum (case report), September, 459–462
Aplastic anemia, ionizing radiation and, December, 559–560
Arterial wall enzyme defects, atherosclerosis and, March, 46
Arteriosclerosis, and hyperadrenocorticism, comparative aspects of (current topic), March, 180–181
Atherosclerosis, acid mucopolysaccharides and, March, 58
  aging and, March, 62
  arterial wall enzyme defects and, March, 46
  as multifocal metabolic disorder, March, 53
  beta-lipoprotein distribution and, March, 31, 34
  carbohydrate macromolecules and, March, 57–79
  extracellular ground substance in, March, 52
  glycoproteins and, March, 67
  mucopolysaccharide-lipoprotein complexes and, March, 67
  mucopolysaccharide metabolism and, March. 65
  mural thrombi in, March, 20
  pathogenesis of, March, 22
    basic aspects of, March, 31–55
  plasma lipoproteins in, March, 34
  potential and early lesions of, morphogenesis and fate of, March, 1–29
  vascular lesions of, March, 2, 16
Atherosclerotic plaque, coronary, origin and degeneration of, March, 81
Atomic bomb radiation, prenatal exposure to, December, 542. See also *Ionizing radiation.*
Atomic bombs, acute effects of, December, 475–483
  autopsy and hematology studies of, December, 480
  shielding and distance studies of, December, 479
Australia antigen testing, in post-transfusion hepatitis, September, 445

Bacteriuria, screening for, in pediatric patients, June, 312
Beta-lipoprotein distribution, atherosclerosis and, March, 34
Beta-lipoproteins, atherogenesis, sclerosis and, March, 31
Bile ducts, extrahepatic, carcinoma of, ionizing radiation and, December, 541
Blood group substances, in man, histological distribution, by immunofluorescence, December, 575–585
Blood lipids, "screening" tests versus profile tests for, March, 162
Bone, lymphangiomas of, September, 359
  malignant vascular tumors of, September, 360
  tumors of, ionizing radiation and, December, 531–532
  vascular tumors of, September, 349–376

Cancer. See also *Tumors* and *Carcinoma.*
  genetic changes in (current topic), September, 347
  of cervix, uterus, and ovary, ionizing radiation and, December, 541
  of lung, radiation and, December, 525–528
  radiation exposure and, at early age, December, 542
Carbohydrate macromolecules, atherosclerosis and, March, 57–79
Carcinoma, of gallbladder and extrahepatic bile ducts, ionizing radiation and, December, 541
  of prostate, ionizing radiation and, December, 539
  of skin, ionizing radiation and, December, 529–530
  of stomach, ionizing radiation and, December, 535–537
  of thyroid, ionizing radiation and, December, 521–523
Cardiac lipofuscin, ionizing radiation and, December, 568
Cardiovascular disease, and hyperlipidemia, lipid studies in assessment of, March, 153–164
  ionizing radiation and, December, 547–549
Central nervous system, ionizing radiation and, December, 561
Cervix, cancer of, ionizing radiation and, December, 541
Children, urinary screening tests in, June, 309–320
Cholesterol, serum, coronary heart disease and, March, 136
Chylomicrons, cardiovascular disease and, March, 154

Cirrhosis, carcinoma of liver and, with ionizing radiation, December 533
Coagulation system, intrinsic, primary activation of, September, 380
Coagulopathy, consumption, principles of diagnosis and management of, September, 377–388
Colchicine intoxication, June, 321–332
"Colonic histiocytosis," ultrastructural morphogenesis of, September, 421–439
Colonic PAS-positive macrophages, ultrastructural morphogenesis of, September, 421–439
Connective tissue diseases, viruses and (current topic), June, 340
Consumption coagulopathy, differential diagnosis of, September, 383
principles of diagnosis and management of, September, 377–388
Copper-reducing substances, screening for, in pediatric patients, June, 312
Coronary arteries, fatty streaking of, March, 3
gelatinous elevations of, in atherosclerosis, March, 16
Coronary heart disease, lipids and lipoproteins and, in women, March, 142
serum lipid precursors of, March, 129–151
Coronary thrombosis, acute, and intramural hemorrhage, pathogenesis of, March, 85
Coronary thrombus, conversion of into plaque tissue, March, 106
origin and fate of, March, 81–128

Embolism, fat, macroglobule and, March, 165–171
Emphysema, pulmonary, intraluminal exudates of nonrespiratory bronchioles in, June, 333–336
Erythremic myelosis, ionizing radiation and, December, 509
Erythroleukemia, ionizing radiation and, December, 509
Ethanol, and liver (current topic), September, 343

Fat embolism, macroglobule and, March, 165–171
Fat particles, in plasma, March, 165–171
Fatty acids, nonesterified, cardiovascular disease and, March, 157
Fatty streaking, of aorta and coronary vessels, in atherosclerosis, March, 3
Fibrinolytic system, primary activation of, September, 381
Fibrosis, renal medullary, in hypertension, December, 587–597
Focus of infection theory, poststreptococcal sequelae and (current topic), September, 345
Fredrickson hyperlipoproteinemias, March, 160

Gallbladder, carcinoma of, ionizing radiation and, December, 541
Gastric carcinoma, ionizing radiation and, December, 535–537
Genetic changes, in cancer (current topic), September, 347
Globulin, antilymphocyte, human renal allografts and, June, 299–308
Glomerulonephritis, membranous, current status of, June, 209–231
rapidly progressive, in adult, immunopathologic study of, June, 185–208
Glycoproteins, atherosclerosis and, March, 67
Gonadal radiation, late effects of, December, 551–558
Graft versus host reactions, following transplantation of allogeneic hematopoietic cells, September, 389–402
Ground substance, extracellular, in atherosclerosis, March, 52

Heart disease, coronary, lipids and lipoproteins and, in women, March, 142
serum lipid precursors of, March, 129–151
Heart weight, renal medullary fibrosis and, December, 591
Hemangiomas, of skull and jaw, September, 351
of tibia, September, 356
of vertebrae, September, 353
soft tissue, September, 365
Hemangiopericytomas, involving bone, September, 365
Hematopoietic cells, allogeneic, transplantation of, graft versus host reactions following, September, 389–402
Hemorrhage, intramural, acute coronary thrombosis and, pathogenesis of, March, 85
Hepatitis, post-transfusion, September, 441–451
High density lipoproteins, cardiovascular disease and, March, 156
Hiroshima and Nagasaki, atomic bomb study populations of, dosimetry and pathology study program of, December, 487–492
Histiocytosis, colonic, ultrastructural morphogenesis of, September, 421–439
Horse immunoglobulin G, glomerular deposits of, with nephritis, following administration of antilymphocyte globulin, June, 229–308
Hyperadrenocorticism, and arteriosclerosis, comparative aspects of (current topic), March, 180–181
Hyperlipidemia, and cardiovascular disease, lipid studies in assessment of, March, 153–164
Hyperlipoproteinemia, acquired, March, 161
types I to V, March, 160
type IV prebeta, March, 148
Hypertension, renal medullary fibrosis in, December, 587–597

Immune complex disease, membranous glomerulonephritis and, June, 224
Immunofluorescence, use in study of histological distribution of blood group substances in man, December, 575–585
Immunopathology, ionizing radiation and, December, 563–566
Infant, urinary screening tests in, June, 309–320
Infection, ionizing radiation and, December, 563
Injury, glomerular reaction to, patterns of, June, 233–252
Intramural hemorrhage, acute coronary thrombosis and, pathogenesis of, March, 85
Ionizing radiation, and leukemia, December, 505–514

Ionizing radiation (*Continued*)
effects on growth and development, December, 493–499
neoplasia and, December, 501–546
pathologist and (current topic), December, 467–468

Jaw, and skull, hemangiomas of, September, 351

Kidney, antihypertensive function of, December, 594
weight of, renal medullary fibrosis and, December, 591

Lead poisoning, screening for, in pediatric patients, June, 314
Leukemia, ionizing radiation and, December, 505–514
Lipids, and lipoproteins, coronary heart disease and, in women, March, 142
blood, abnormalities of, March, 158
serum, as predictors of coronary heart disease, March, 135
coronary heart disease and, March, 129–151
determinants of levels of, March, 131
prognostic significance of, in coronary heart disease, March, 130
Lipofuscin, cardiac, ionizing radiation and, December, 568
Lipoprotein pattern, coronary heart disease and, March, 139
Lipoproteinemia, type II beta, March, 148
Lipoproteins, and lipids, coronary heart disease and, in women, March, 142
beta, distribution of, in atherosclerosis, March, 34
high density, cardiovascular disease and, March, 156
low density, cardiovascular disease and, March, 156
plasma, in atherosclerosis, March, 34
very low density, cardiovascular disease and, March, 154
Liver, alpha-1-antitrypsin deficiency and, March, 173
carcinoma of, ionizing radiation and, December, 533–534
ethanol and (current topic), September, 343
Low density lipoproteins, cardiovascular disease and, March, 156
Lumen, recanalized, in coronary thrombosis, March, 107
Lung, cancer of, radiation and, December, 525–528
Lymphangiomas, of bone, September, 359
Lymphoma, malignant, ionizing radiation and, December, 515–519

Macroglobule, fat embolism and, March, 165–171
Macromolecules, carbohydrate, atherosclerosis and, March, 57–79
Macrophages, colonic PAS-positive, ultrastructural morphogenesis of, September, 421–439
Malignant tumors, vascular, of bone, September, 360
Membranous glomerulonephritis, current status of, June, 209–231
Meningiomas, extracranial, pathogenesis of, September, 453–459
of parotid gland, September, 453–459
Metaplasia, myeloid, with myelofibrosis, ionizing radiation and, December, 508
Mucopolysaccharide-lipoprotein complexes, atherosclerosis and, March, 67
Mucopolysaccharide metabolism, atherosclerosis and, March, 65
Mucopolysaccharides, acid, atherosclerosis and, March, 58
excessive, screening for, in pediatric patients, June, 313
Mural thrombi, March, 20
Myelofibrosis, with myeloid metaplasia, ionizing radiation and, December, 508
Myeloid metaplasia, with myelofibrosis, ionizing radiation and, December, 508
Myelosis, erythremic, ionizing radiation and, December, 509

Neoplasia, ionizing radiation and, December, 501–546
Nephritis, glomerular deposits of horse immunoglobulin G with, following administration of antilymphocyte globulin, June, 299–308

Osteolysis, massive, and skeletal angiomatosis, September, 359
Ovarian radiation effects, December, 557
Ovary, cancer of, ionizing radiation and, December, 541

Parotid gland, meningioma of, September, 453–459
Pathology, and future (current topic), June, 337–339
comparative (current topic), March, 177–179
Pediatric patients, urinary screening tests in, June, 309–320
Phospholipids, coronary heart disease and, March, 137
Plaque, coronary atherosclerotic, conversion of from coronary thrombus, March, 106
origin and degeneration of, March, 81
Plasma lipoproteins, in atherosclerosis, March, 34
Polycythemia rubra vera, ionizing radiation and, December, 509
Poststreptococcal sequelae, focus of infection theory and (current topic), September, 345
Prostate, carcinoma of, ionizing radiation and, December, 539
Proteins, serum, ionizing radiation and, December, 563
Pulmonary emphysema, intraluminal exudates of nonrespiratory bronchioles in, June, 333–336

Radiation, ionizing, pathologist and (current topic), December, 467–468. See also *Ionizing radiation.*
Radiation exposure, cancer and, at early age, December, 542

Renal allografts, human, administration of antilymphocyte globulin and, June, 299–308
in long-term survivors, June, 253–298
Renal concentrating ability, renal medullary fibrosis and, December, 593
Renal medulla, interstitial cells of, antihypertensive function of, December, 595
Renal medullary fibrosis, in hypertension, December, 587–597
Renal vein thrombosis, membranous glomerulonephritis and, June, 227

Salivary glands, tumors of, ionizing radiation and, December, 542
Skeletal angiomatosis, and massive osteolysis, September, 359
Skin, carcinoma of, ionizing radiation and, December, 529–530
Skull, and jaw, hemangiomas of, September, 351
Soft tissue hemangiomas, September, 365
Spleen, shielding of, ionizing radiation and, December, 564
Stomach, carcinoma of, ionizing radiation and, December, 535–537

Testicular radiation effects, December, 551
Thrombocythemia, ionizing radiation and, December, 509
Thrombosis, acute coronary, and intramural hemorrhage, pathogenesis of, March, 85
renal vein, membranous glomerulonephritis and, June, 227
Thrombus, canalization of, in coronary thrombosis, March, 107
coronary, conversion of into plaque tissue, March, 106
origin and fate of, March, 81–128
mural, March, 20
Thyroid, carcinoma of, ionizing radiation and, December, 521–523
Tibia, hemangioma of, September, 356
Triglycerides, coronary heart disease and, March, 138
Tumor(s). See also *Cancer* and *Carcinoma*.
malignant vascular, of bone, September, 360
multiple primary, ionizing radiation and, December, 543
of bone, ionizing radiation and, December, 531–532
of salivary glands, ionizing radiation and, December, 542
vascular, of bone, September, 349–376
Warthin's, September, 403–420

Urinary screening tests, clinical application of, in pediatric patients, June, 315
in infant and young child, June, 309–320
Uterus, cancer of, ionizing radiation and, December, 541

Vascular disease, renal medullary fibrosis and, December, 591
Vascular tumors, of bone, September, 349–376
malignant, September, 360
Vertebrae, hemangiomas of, September, 353
Very low density lipoproteins, cardiovascular disease and, March, 154
Viruses, and connective tissue diseases (current topic), June, 340

Warthin's tumor, September, 403–420
